Graining Topcoats Fillable

Markers

Graining Pens

Code #: 1GP-XXXX

Assortment
All 5 Colors
Code: 1GP-A5

9059 Light Oak	3014 Medium Brown	3038 Walnut	3054 Dark Brown	1000 Black

We have designed these markers to make it easy for you to replace grain that is missing over wood, fill stick and burn-in stick repairs, and many more applications. A Topcoat is recommended to be used with these pens to help protect your repair. Please visit us online at www.finishrepair.com to see a video demo of the Graining Pens being applied.

Clear Topcoats

Code #: 1-16-XXXX Valve Marker / Acrylic Finish
Code #: 1-19-XXXX Valve Marker / Polyurethane Varnish
Code #: 1-14-XXXX Valve Marker / Lacquer Finish
Code #: 1-88-XXXX Valve Marker / Waterbase

1011 Flat	3011 Satin	6011 Semi-Gloss	9011 Gloss

* Wood Panels are only to show what a clear would look like over natural pine or oak wood.

Valve Marker Clear Topcoats are formulated to help repair or remove minor surface and edge marks. Designed for medium build and flow. Choose from the four different types when working with your finish. Always check Adhesion and Interior Use Only.

Acrylic Topcoat = Solvent
Polyurethane Varnish Topcoat = Solvent
Lacquer Topcoat = Solvent
Waterbase Topcoat = Water

* Precat Finishes = We recommend Acrylic Topcoat

Fillable Pens

Fillable Components - Solvent

Felt Marker Series 1 - UV are designed for UV cured wood finishes that are light to dark in color. You will have the flexibility for both finish and edge repair because of the color strength and formulation of the marker base. The marker base is not made up of UV, but can be compatible in most cases to allow you touch-up and repair in between UV Seal & UV Topcoat. Dries Instantly with out light to cure it. The advantage of using this marker over our normal bases is that we have added a UV Blocker and modified the base. Always test for Adhesion and Interior Use Only. Consult with your Rep or contact us for more information.

Fill Sticks are used to fill scratches, cracks, holes, and any other small defect area. It is ideal to use our Fill Stick Scraper when removing extra color around repair or filled area. Please don't use a rag or cloth because it may first appear that the defect area is filled, but when you use a protection coat you will see that the rag or cloth has pulled some of the color out.

If someone or something can touch your repair, then we highly recommend using a protection coat (Sealer, Topcoat, or Clear Resin). Interior Use Only. * If you have a Competitors Fill Stick, please see all color that start with SXXX. It could compare or match desired color needed. Please contact your Rep if you any questions on Code / Color Name.

Powder Sticks

96 Stock Colors

Powder Sticks (Formerly Background Sticks) are used to add or alter color when repairing and touching up wood. These sticks allow for you to replace color on raw or finished edges and flat surfaces. The old way would require you to use powders, but this new way is almost as easy as using pastels on a canvas.

These sticks are designed for blending colors to achieve the color match. Please make sure to add a protection coat (Sealer or Topcoat) to lock in color. To see the Powder Stick in action, visit us at **www.finishrepair.com**

What is it?

The term "CA" is short for Cyanoacrylate, a one-part instant cure adhesive. A chemical synthesis process produces Cyanoacrylates by changing acetate to an acrylate. This process also includes the first purification step for making Cyanoacrylates. CA Glues Cyanoacrylate is then further distilled until this crude acrylate becomes a Cyanoacrylate monomer that is at least 99.5% pure. This high purity level gives CA Glues superior cure strength, reduces cure times, and helps increase stability and shelf life. CA Glues are surface insensitive formulated to provide bonding on a wide variety of materials without primers. CA Glues are **Made in the USA**.

If you are using our competitors CA Glues, please contact us by Phone, E-mail, or Fax for the cross reference to our code numbers.

Sealers & Blush Control

Sanding Sealers - Nitrocellulose

Fast Dry

Aerosol Code #: 3-1000

Formulated for quick drying and easy sanding. Ideal for production lines / cabinet shops / or a quick touch-up. Interior Use Only / Apply 3 - 5 mils wet

Sand 280 / 320

Dead Flat

Aerosol Code #: 3-10DF

For flat and dead flat finishes. Sheen on the sealer is 5 - 8 sheen. Flattening agent mixes perfectly and is easy to sand. Interior Use Only / Apply 3 - 5 mils wet

Sand 280 / 320

Heavy Body

Aerosol Code #: 3-10HB

Quick drying & easy to sand. Designed for medium high solids and performs perfect with all of our lacquers. Interior Use Only / Apply 3 - 5 mils wet

Sand 280 / 320

Burn-In

Aerosol Code #: 3-10BS

Designed to eliminate halos or sheen differences caused by Burn-In Sticks (Gloss). Light sand with 320 or 400 grit to minimize scratching on repair. Interior Use Only / Apply 3 - 5 mils wet

Sand 320 / 400

Heavy Body - Flat

Aerosol Code #: 3-10HB

Finishes that need to have High Solids, Excellent Flow, Quick Build, & Flawless atomization. For maximum results use Professional Topcoat Lacquer. Interior Use Only / Apply 3 - 5 mils wet

Sand 280 / 320

Wash Coat

Aerosol Code #: 3-200W

Very low in solids to lay down just a little sealer.

Interior Use Only / Apply 3 - 5 mils wet

Sand 280 / 320

Sanding Sealer - Vinyl

Vinyl

Aerosol Code #: 3-2000

Light or Natural finishes Use Vinyl Sealer with C.A.B. Topcoats for a true non-yellowing finish. Interior Use Only / Apply 3 - 5 mils wet

Sand 280 / 320

Sanding Sealer - Precat

Precat

Aerosol Code #: 3-3000

Excellent flow and adhesion. Use with our Pre-Cat Lacquers. Easy to sand. Interior Use Only / Apply 3 - 5 mils wet

Sand 280 / 320

Clear - Blush Remover

Blush Remover

Aerosol Code #: 3-4000

Opens the finish and allows the trapped moisture (White / Blush) to escape. Apply wet for 10 - 30 minutes to see results. Interior Use Only / Apply 3 - 5 mils wet

Blush Remover (+)

Aerosol Code #: 3-400P

(+) is formulated to stay open even longer. Opens the finish and allows the trapped moisture (White / Blush) to escape. Apply wet for 10 - 30 minutes to see results. Interior Use Only / Apply 3 - 5 mils wet

Non-Catalyzed

Aerosol Topcoats

Sheens

Gloss	90
Semi-Gloss	60
Satin	30
Mid Satin	20
Flat	10
Dead Flat	05

Understanding Sheens

(**Gloss** = **90**) is like a mirror & the lower the number will give you less reflection (**Flat** = **10**).

Ordering Information

Example:

Aerosol Can: Extra Flow - Flat

1. **Choose Type** **2.** **Choose Sheen**

Aerosol Code: 3-1010

Clear Topcoat - Nitrocellulose / Industrial

Extra Flow

Aerosol Code #: 3-10XX

Designed for an orange peel free finish with no rubbing. Best used when a flawless finish is desired.

Medium Solids / Medium Build. Interior Use Only / Apply 3 - 5 mils wet

Available Sheens

Gloss (90) | Semi-Gloss (60) | Satin (30) | Mid Satin (20)
Flat (10) | Dead Flat (05)

Flow-Out

Aerosol Code #: 3-F0XX

Use to eliminate over spray from spot repairs or smooth and level a finish that has become orange peeled. Ideal for minor repair and you need just a touch of Topcoat. Low solids / Low Build. Interior Use Only / Apply 3 - 5 mils wet

High Solids

Aerosol Code #: 3-1HXX

High Solids, Excellent Flow, Quick Build, & Flawless atomization. For maximum results use Professional Sealer. Ideal for chairs or repairing from white wood. Interior Use Only / Apply 3 - 5 mils wet

Clear Topcoat - Nitrocellulose / Premium

Premium Blend

A low solids and high solids blend nitrocellulose lacquer designed to achieve excellent flow over most lacquer based finishes.

Pick from one of seven sealers to achieve your ideal results. The nozzle (fan) has a soft spray that atomizes to minimize over spray.

Low Solids - Premium Blend (LS)

Aerosol Code #: 3-PLS-XX

High Solids - Premium Blend (HS)

Aerosol Code #: 3-PHS-XX

Available Sheens

Gloss (90) | Semi-Gloss (60) | Satin (30) | Mid Satin (20)
Flat (10) | Dead Flat (05)

Precat C.A.B.

UV Repair

Aerosol Topcoats

Clear Topcoat - Precat

Extra Flow

Aerosol Code #: 3-30XX

Designed for an orange peel free finish with no rubbing. Best used when a clean hard finish is desired. You must use a Precat or Vinyl sealer.

Interior Use Only / Apply 3 - 5 mils wet

Available Sheens

Gloss (90) | Semi-Gloss (60) | Satin (30) | Mid Satin (20)
Flat (10) | Dead Flat (05)

High Solids

Aerosol Code #: 3-3HXX

Finishes that need to have High Solids, hard finish, excellent flow, & quick build. You must use a Precat or Vinyl Sealer.

Interior Use Only / Apply 3 - 5 mils wet

Flow-Out

Aerosol Code #: 3-3FXX

Use to eliminate over spray from spot repairs or smooth & level a finish that has become orange peeled. Low Solids / Low Build. You must use a Precat or Vinyl Sealer. Interior Use Only / Apply 3 - 5 mils wet

Clear Topcoat - C.A.B. Finish

Extra Flow

Aerosol Code #: 3-20XX

Designed for an orange peel free finish with no rubbing. Best used when a flawless finish is desired. You must use a vinyl sealer for maximum non yellowing! Interior Use Only / Apply 3 - 5 mils wet

Available Sheens

Gloss (90) | Semi-Gloss (60) | Satin (30) | Mid Satin (20)
Flat (10) | Dead Flat (05)

High Solids

Aerosol Code #: 3-2HXX

High Solids, Excellent Flow, Quick Build, & excellent atomization. You must use a Vinyl Sealer for maximum non yellowing! Interior Use Only / Apply 3 - 5 mils wet

Flow-Out

Aerosol Code #: 3-2FXX

Use to eliminate over spray from spot repairs or smooth and level a finish that has become orange peeled. You must use a Vinyl Sealer for maximum non yellowing! Low Solids / Low Build. Interior Use Only / Apply 3 - 5 mils wet

Clear Topcoat - UV Repair

Aerosol Code #: 3-UVXX

Formulated to adhere to most UV Finishes. * See Suggestions on testing our product over your UV to the right.

Please note this product was designed to assist when doing touch-up and repair on UV Finishes. It will never have the same properties as the original UV Finish!

Available Sheens

Gloss (90) | Semi-Gloss (60) | Satin (30) | Mid Satin (20)
Flat (10) | Dead Flat (05)

Suggestions

1. Scuff Sand	Scotch Brite (Grey) or Steel Wool (4/0).
2. Spray UV Repair	Spray 3 to 5 mils wet over that has been scuffed sanded.
3. Curing	Please allow 3 to 5 days before testing for adhesion on your UV.
4. Adhesion Test	You can use a cross hatch or a nickel to test. We can not guarantee adhesion.
	Customer must make own decision and assumes all liability for any defects or claims.
